

Tylö impression with tray.

Tray for Impression steam showers.

All Tylö's Impression steam showers can now be equipped with trays. The tray has a construction made of cast marble which is an extremely shape permanent material. The surface finish on the tray results in a good drainage. The tray also has a built-in water seal which gives any Tylö Impression steam shower with a tray a total height of 2200 mm, i.e. 100 mm higher than without the tray.

The tray is delivered with a cup for waste water to be mounted on the steam outlet. The cup protects the tray and guarantees its functionality.
